RCRA 3012 PRELIMINARY ASSESSMENT COMMENTS  
C. J. MARTIN COMPANY  
P. O. BOX 1089  
NACOGDOCHES, TEXAS 75963

Documentation of Site Activities

A RCRA 3012 preliminary assessment was conducted by Henry E. Simpson of Engineering-Science, Inc. concerning the chemical application procedures of C. J. Martin Company. The assessment, performed on March 5, 1985 at 10:45 a.m., consisted of an interview with Mr. Raymond D. Rinker, Jr., Senior Vice President, a site surveillance, and a photograph. The interview took place in Mr. Rinker's office above the warehouse at the site. The C. J. Martin Company is a subsidiary of Texas Farm Products Company and the site is owned by Texas Farm Products Co. The site contains a formulation plant, warehouses, office building, and a farm supply store.

Waste Management Practices

The C. J. Martin Company was founded in 1883 and has been at this site since about 1967. Before 1967, they were located in Austin, Tx. They have been a subsidiary of Texas Farm Products Co. since about 1929. The C. J. Martin Company formulates insecticides from basic chemicals which they obtain directly from the chemical manufacturers. No herbicides are handled. The chemicals are formulated for sale only and they do not do any application of the chemicals. The rinsate and wash water from the formulation equipment drains into a sump and is pumped into a covered concrete wastewater pit. A vacuum truck is used to take the water from the pit to an approved disposal site. They were using a disposal site near Beaumont, Tx.; however, they are now taking the waste water to Sulphur, La. or to a well site near Overton, Tx. Empty chemical bags are taken to the city dump. Empty drums are taken to Houston for cleaning and disposal. All containers are handled per the instructions on the permits.

Assessments and Conclusions

The land around the site is for residential and business use. Due to the presence of the on-site wastewater pit, a low priority site inspection is recommended under the RCRA 3012 program.
